AL THAIL GROUP OF COMPANIES

Charting success stories in the Middle East & beyond

Welcome to Al Thail Group of Companies, a journey that began in 1998 and has evolved into one of the most respected conglomerates in the Sultanate of Oman and the United Arab Emirates. Rooted in Oman's rich heritage, we pride ourselves on integrity, respect, and responsibility.

OUR STORY

From a humble trading enterprise, Al Thail Group of Companies has diversified into multiple sectors, including metal trading, recycling, manufacturing, construction, Decommissioning and transportation. Our journey is a testament to the GCC's business-friendly environment and our commitment to sustainability.

OUR BUSINESS VERTICALS

(a) SCRAP PROCESSING & TRADING (FERROUS & NON-FERROUS METALS)

As a leading buyer and exporter of ferrous and non-ferrous metal scrap, driving sustainability through cutting-edge recycling processes, we pride ourselves on being at the forefront of sustainability and contributing to the responsible use of resources.

Al Thail Metal Scrap stands as the flagship company under ATG, operating within this segment. We are recognized as one of the foremost independent scrap metal processing companies in the Sultanate of Oman & UAE. Our group has made significant investments in modern machinery, equipment, and vehicles, aimed at maximizing productivity while ensuring safety and efficiency.

We have garnered high recommendations from both our clients and suppliers, owing to our unwavering commitment to personalized services and attention to detail. Our core business encompasses the trading, processing, and recycling of metal scrap (both ferrous and nonferrous), as well as plastic scraps, rubber scraps, and used batteries sourced from a wide array of sectors, including industry (both public and private sectors) and construction and demolition projects.

⑥ DEMOLITION, DISMANTLING AND DECOMMISSIONING OF INDUSTRIAL & COMMERCIAL STRUCTURES

Since 2012, Al Thail Group has expanded its expertise in decommissioning and demolition, completing numerous projects across the Middle East to offer cohesive and professional solutions. Our team of professionals specializes in safety and risk management, ensuring operations align with sustainability practices by minimizing risks and maximizing energy and natural resource reclamation.

With a proven track record in dismantling industrial and commercial plants in Oman & UAE, ATG aims to establish safe ventures across the Middle East, prioritizing safety, quality, and accountability. Our adherence to HSE (health, safety, and environment) protocols is consistent across all units, supported by ISO 9001, ISO 14001, and ISO 45001 certifications, along with OSHAD certification from Abu Dhabi.

HEALTH, SAFETY & ENVIRONMENT (HSE)

The Management is committed to providing and maintaining HSE in workplace for all employees, contractors, clients, visitors and the public utmost important. This would be achieved by adopting HSE Management System through active employees participation and work towards zero accident target through proactive approach by conducting Risk Assessments and Mitigation of all high-risk activities.

The company has evolved a robust HSE Policy. The HSE Objectives are;

- Eliminate or minimize workplace hazards and risks as far as reasonably practicable.
- Ensure 100% compliance with Legal requirements.
- Zero Fatality and Zero Loss Time injury.

We are ISO 14001-2015 and ISO 45001-2018 and OSHAD certified company.

QUALITY POLICY STATEMENT

Being an ISO 9001: 2015, certified Company, we are driven by the seven (7) key quality management principles viz., Customer Focus, Leadership, Engagement of People, Process Approach, Improvement, Evidence-Based Decision-Making, and Relationship Management.

We constantly review the effectiveness of Quality Management Systems to achieve the continual improvement.

© RECYCLING & MANUFACTURING OF NON-FERROUS METALS

Al Thail Group is engaged in recycling various waste materials, particularly ferrous and non-ferrous metal scraps, plastics, rubber wastes, and more. Committed to creating a sustainable future, the group works closely with regulatory authorities to reduce waste and promote a circular economy through responsible waste management.

Aligned with its environmental commitment, Al Thail Metal Recycling LLC has established a 'Used Lead Acid Battery (ULAB) Recycling Plant' at Sohar Industrial Estate, Sultanate of Oman, utilizing cutting-edge technology. Additionally, plans are underway for aluminum and copper smelters, with E-waste recycling also a priority.

BATTERY RECYCLING: OMAN'S PREMIER CIRCULAR ECONOMY HUB

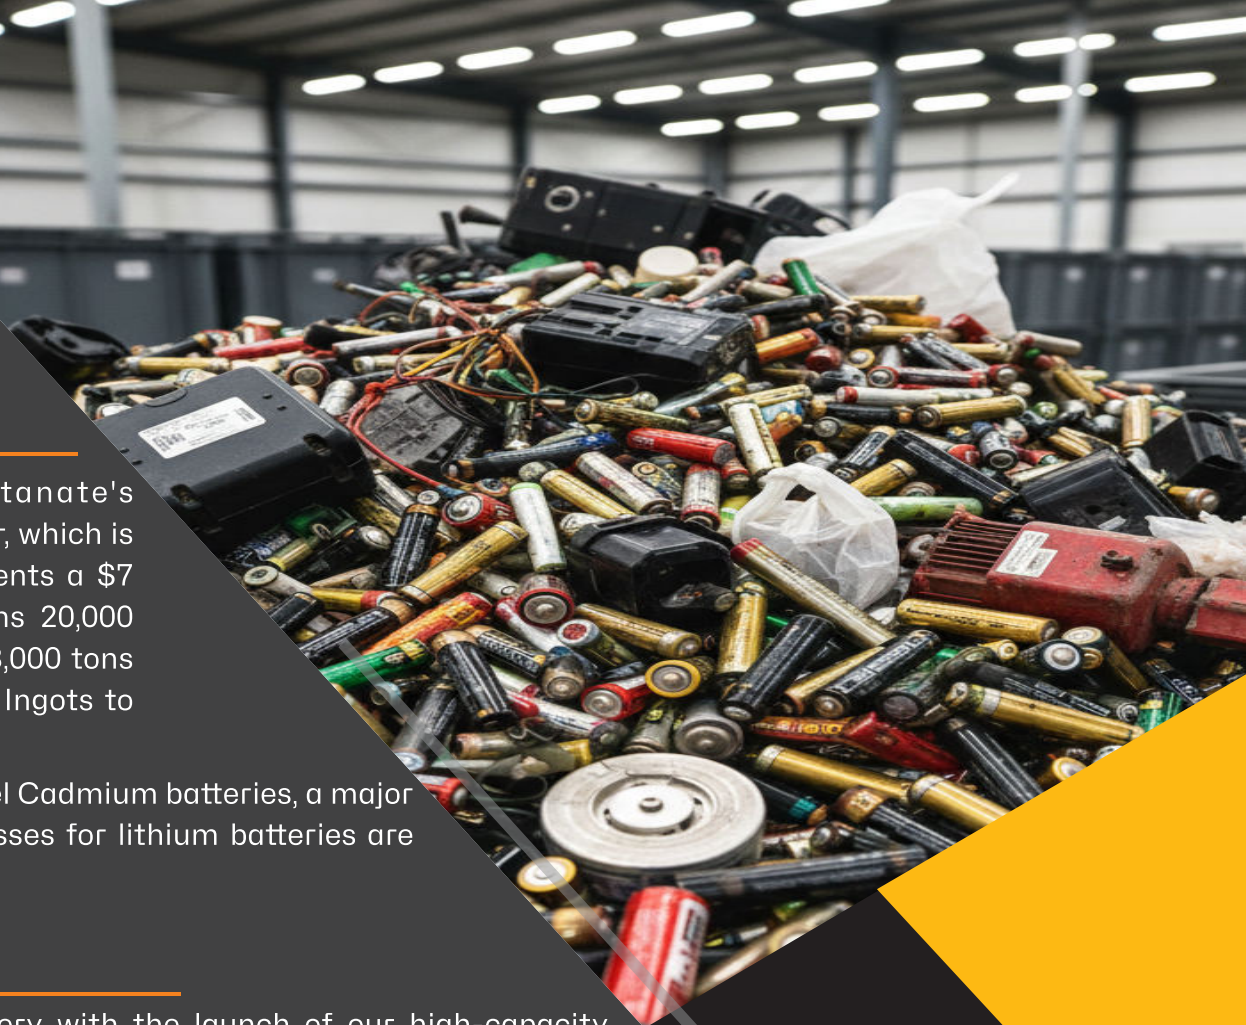

The Al Thail Group (ATG) is leading the Sultanate's environmental transition. Its flagship facility in Sohar, which is the largest battery recycling plant in Oman, represents a \$7 million investment. This world-class operation spans 20,000 square meters, boasts a capacity to process up to 18,000 tons annually, and delivers high-grade 99.98% pure Lead Ingots to the global market.

ATG has also extended its expertise to recycling Nickel Cadmium batteries, a major achievement of its R&D efforts. The recycling processes for lithium batteries are currently still under development.

ALUMINIUM RECYCLING

In 2025, we reached a new frontier in metal recovery with the launch of our high-capacity Aluminum recycling unit in Sohar. Operating with a robust capacity of 12,000 tons per annum, the facility utilizes advanced sorting and smelting technologies to process diverse grades of aluminum scrap into high-purity ingots and precision-engineered alloys, tailored to specific industrial requirements.

This initiative represents a significant leap in our technical capabilities, transforming raw waste into a premium, value-added Omani product. By exporting these high-quality ingots to the global market, we are not only showcasing the excellence of the Sultanate's manufacturing sector but also directly contributing to Oman's GDP. Through this facility, Al Thail Group bridges the gap between local sustainability and international trade, reinforcing our commitment to a circular economy on a global scale.

WEEE WASTE RECYCLING & RESOURCE RECOVERY

Al Thail Group (ATG) utilizes a sophisticated recovery facility in Sohar to transform a diverse spectrum of Waste Electrical and Electronic Equipment (WEEE)—ranging from industrial machinery and IT infrastructure to household appliances—into high-value raw materials. Operating through a specialized segregation process, the group recycles WEEE outputs such as non-ferrous metals like aluminum and copper in-house and directs ferrous metals to local mills, with future plans to integrate these into an upcoming ATG steel mill. The facility's comprehensive circular economy framework also includes converting various polymer grades into high-quality chips and granules, recycling Lead Acid and Nickel Cadmium batteries on-site, and conducting R&D for Lithium-ion solutions, while ensuring environmental responsibility by exporting high-grade Printed Circuit Boards (PCBs) to international partners for precious metal recovery.

COPPER & BRASS RECYCLING: STRATEGIC NON-FERROUS RESOURCE RECOVERY

In 2025, we arrived in another milestone in non-ferrous metallurgy with the launch of our Copper and Brass recycling division. With an impressive processing capacity of 5,000 tons per annum, our Sohar facility transforms raw scrap into high-purity Copper and Brass ingots. By converting waste into high-value industrial outputs, we are not only championing environmental sustainability but also actively strengthening Oman's GDP through localized value addition.

④ TRADING, PROCESSING & RECYCLING OF PLASTIC AND RUBBER

The group is diversifying its attention into Recycling, Processing and Trading of Plastic and Rubber. The Group has its vision to create a sustainable and environmental-friendly future for the society at large by reducing waste and promoting a circular economy through recycling and responsible waste management, working in close coordination with regulatory authorities.

1) PLASTIC RECYCLING

As a cornerstone of ATG's vision, ATMER focuses on recycling a wide range of plastics including PP, PVC, HDPE and LLDPE. Aligned with our commitment to sustainability and environmental stewardship, we prioritize safer recycling methods, achieving optimal resource recovery with minimal energy consumption.

2) RUBBER PROCESSING & TRADING

Rubber is one of the most versatile commodities in the world. It has a wide range of applications, from tires and hoses to gloves and balloons.

ATG engages in the buying, selling, and processing of natural or synthetic rubber scraps in various forms, including tyres, conveyor belts, and engineering rubbers. This segment reflects our commitment to sustainability and the circular economy.

WHAT WE TRADE & PROCESS

- | | |
|-------------------------------|------------------------|
| 1) Conveyor Belts (All kinds) | 3) Rubber pipes |
| 2) Tyers | 4) Engineering Rubbers |

Ⓔ BUILDING MATERIALS

Another vital player within the group is Al Thail Steel World LLC, serving as a trusted stockiest of building materials covering all major global brands. **Al Thail Steel World LLC**, established in the year 2011 in Ghala Industrial area as a new division of Al Thail group, is one of the leading companies in the Sultanate of Oman to cater to the various construction requirements all over Oman.

F CONSTRUCTION & CONTRACTING

ATG provides civil and mechanical construction as an industrial engineering solution. We undertake all industrial and commercial construction and contracting projects. Al Thail Caravans & Contracting LLC (ATCC) & Al Thail Trad & Cont. (ATTC) are built as a customer – oriented firm offering full range of industrial cleaning & general maintenance in the Oman. Its services include:

- Industrial and Commercial Construction Works
- General Industrial Cleaning
- Refurbishment Works
- Maintenance Works
- Erection Works
- Interior & Exterior Works
- Transporting Solutions
- Material Shifting.

At our core, we're dedicated to upholding the highest standards for our clients in both institutional and industrial sectors. Our expertise extends to a wide array of technical equipment, operated by skilled professionals, ensuring top-notch performance every step of the way.

⑨ **MANUFACTURING OF CARAVANS/ PORTA CABINS**

Al Thail Caravans & Contracting LLC under ATG is a well-known Manufacturer, Trader & Supplier of Porta Cabins in Oman. At Al Thail excellences is a commitment and, in its constant strive for excellence we have emerged as a leading player in the Prefab Construction Industry

Our product range includes Portable Office Cabins, Labour accommodation facilities, Ablution Blocks etc. designed with utmost precision under the supervision of experienced engineers and technicians. These products are highly appreciated by our clients owing to their superior quality and durability.

⑧ **TRANSPORTATION AND HEAVY EQUIPMENT RENTAL**

The division under ATG which provides reliable transportation and cutting-edge equipment for diverse industry needs. The company's excellent transport services cater to varied industry needs across Oman, ensuring reliability and efficiency.

Mr. IBRAHIM ABDUL RAHIM

(Founder & Group Chairman)

“Since inception in 1998, Al Thail Group has registered steady growth to the present level as an independent, self-reliant market leader. During the course of our long journey, we faced several challenges such as war in the Middle East, Global economic recession, Covid pandemic and so on. Despite all these challenges we registered steady growth in our business due to dedication and hard work.

We are driven by the relentless pursuit of excellence through professionalism and dedicated services; we are focused on customer satisfaction and are passionate about people around us and the quality of their lives. As a corporate entity, we recognize our responsibility towards the environment we live in.

While we are proud of our achievements, we look to the years ahead with an ambition to attain further excellence. We are poised to explore new avenues for growth, expand our presence in existing markets, and all over the GCC soon.”

Mr. MOHAMMED SAID ABDULLAH AL SIYABI

(Chairman)

“Over the years, Al Thail Group has established itself as a leader in the Metal recycling industry in Oman. Our commitment to excellence, innovation, and customer satisfaction has been instrumental in shaping our reputation and driving our success.

As we look ahead, we see tremendous opportunities for further growth and expansion, both domestically and internationally. Our vision is to strengthen our presence in existing markets while also exploring new avenues for diversification and expansion.”

OUR COMMITMENT TO SUSTAINABILITY

At Al Thail Group, sustainability is not just a buzzword; it's ingrained in our DNA. From reducing waste to conserving resources, we continuously seek innovative ways to minimize our environmental impact. Our ISO-certified companies adhere to the highest standards of quality, safety, and environmental management, ensuring responsible operations at every step.

OUR GLOBAL PRESENCE

With a significant presence in the UAE and expansion plans across the Middle East, we are poised for regional growth. Our partnerships and subsidiaries in Sharjah, Jebel Ali, and Abu Dhabi reflect our commitment to excellence beyond borders. Beyond the Middle East, the Al Thail Group has extended its influence into India with companies like Ibj Trading and Establishment & IMall.
